SUMMARY

Creative, detail-oriented software engineer with a deep interest in UI/UX and design. Proven track record of creating and implementing successful front and backend web applications. Looking to bring my technical skills to a company with a global reach.

PROFESSIONAL HISTORY

Software Engineer
100Devs | Los Angeles, CA (Remote) | January 2022 - Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured full stack web applications.
- Applied agile methodologies like SCRUM for project management.

Full Stack Web Developer
TylerIsCoding.com | Boston, MA | March 2021 - Present

Created full stack web applications and fully responsive static websites for different clients across small and medium sized businesses. I also consulted on SEO and social media strategy. Some clients included:

Silverpoint Sneakers – Fully responsive website made for a local sneaker and clothing retailer. Customers can place online orders with Shopify, check and cancel orders, and discover what's on sale and what is in stock.

Paterro's Kitchen – A fully responsive static website created for a local restaurant. It includes a menu, restaurant information, and customer reviews.

Ayesha's Salon – A fully responsive static website created for a local hair salon. The site allows clients to check and book appointments. The site also includes any active promotions and a look book.

Inventory Control and Logistics Coordinator
Micro Center Computers and Electronics | Cambridge, MA | 2019 – 2022

- I ensured that all documentation related to inventory flow, shrink trends, and logistics were complete, filed correctly, and accurate.
- Managed large team of warehouse / inventory specialists. We were ranked #1 in our measured metrics out of all Micro Center locations.
- I managed supply chain objectives, handled our main inventory filing systems, and oversaw maintenance operations and supply orders for every department.
